18" Min. clearance upper cabinet to countertop within Min. clearances to cooktop.
A
B
1" Min. distance to nearest left or right side combustible surface above cooktop.
2" Min.
Junction box or outlet – 12" or more above floor and 10" from right side of cabinet.

Do not seal cooktop to countertop.

	A	B
GJC3654R	35 ½	20 ½

36" models require a 30" minimum base cabinet. If cabinet has a drawer, a 4" depth clearance from the countertop to the top of the drawer (or other obstruction) in base cabinet is required. All dimensions are shown in inches.

* Note: 24" (61 cm) min. clearance if bottom of wood or metal cabinet is protected by not less than ¼" (0.6 cm) flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" (0.04 cm) stainless steel, or 0.024" (0.06 cm) aluminum or 0.020" (0.05 cm) copper. 30" (76.2 cm) min. clearance between top of cooking platform and bottom of unprotected wood or metal cabinet.

Important note on base cabinet construction:
After making the countertop cutout, some installations may require notching down the base cabinet side walls to clear the burner box. To avoid this modification, use a base cabinet having side walls wider than the cutout.

Cutout dimensions have not changed from previous Whirlpool Gold® Electric Cooktops.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product.
Specifications subject to change without notice.
